

(STEP 8)

Place one side rail on each side of the display top (the extruded end on each side rail should be towards the back portion of display). Make sure you leave enough room to insert the cover (fully assembled with front and rear rail). Then secure the side rails with the four clamps.

(STEP 9)

Place cover into the pivot mounts on the back portion of side rails — behind the extruded end on each side rail. Top Spin Logo on cover should be front facing.

(STEP 10)

Roll cover forward and lock down rear rail using the spring loaded auto latch.

Assembly is now complete

## Display Rack Installation Instructions

### Parts List

- Hardware (Pre-attached to display support arms, support legs and display top)
- Display Top
- Support Arms (2 pc)
- Support Legs (2 pc)
- Support Braces (2 pc)
- Mini Top Spin Rollup Tonneau (Cover fully assembled with front and rear rails and two separate side rails)
- Header Card
- Brochure Holder/Reorder Sticker
- Brochure Pack
- Four Clamps

### (STEP 1)

Place display top on floor.

### (STEP 2)

Attach one support arm on each side of display top using the 2 3/4" bolts supplied.

### (STEP 3)

Attach one support leg on top of each support arm using the 2 3/4" bolts supplied.

### (STEP 4)

Attach support brace on each side of the support arms using the 2 3/4" bolts supplied.

### (STEP 5)

Flip this display over so the display top is on the top. The open portion of the display should face towards the front.

### (STEP 6)

Attach sign with the 3 bolts pre-inserted in the back bar of display top.

Place brochure reorder sticker on the inside of the brochure holder.

### (STEP 7)

Pull off the protective film from the adhesive strips and position brochure holder on the right side of display (as shown) and press firmly. Load brochure holder with pre-packed brochures.
